iBid PLATFORM
THE FUTURE OF
THE DECENTRALIZED
FINANCE
iBid aspires to create a global trading and service database platform, with almost zero transaction fees worldwide. The iBid common currency will be the main payment currency in this ecosystem.

iBid is aiming to become a major platform in the field of decentralized applications (DApps), such as Ethereum and Cardano.
Commercial network – service on global-scale

Exchange financial values directly (listings, transactions, and service fees) from large corporations such as Airbnb, Craigslist, Postmates, ... to individual buyers and retailers.

Exchange of financial and strategic values (internal aggregation of customer and transaction data) from similar corporations to the entire ecosystem.

Create new financial value for market participants that contribute to the development of the platform (e.g. building new technologies for the iBid platform and introducing users and new business).

Built on open, distributed and shared data to promote transparency and collaboration.
FEATURES OF iBid PLATFORM
iBid operates on a decentralized platform, users have the right to list their products - services or DApps on the iBid Blockchain platform.
Individuals who contribute to iBid's ecosystem such as token holders will gain profit which is appropriate to their dedication to the company.
iBid works as a non-profit model, so the contributors of the platform will gain benefit from iBid ecosystem development fund to award.
iBid has a diverse digital asset ecosystem, full of mixed forms: **Decentralized exchange**, Gaming Decentralize, DAPP, wallet, P2P Lending, iBid Privacy, Auctions on blockchain, etc.
MARKET SIZE
iBid Market Size

The iBid development team still has a long way to go, and certainly, it is not an easy path.

However, if iBid can do that, the future market of iBid is extremely large.

Why? Looking at the current Ethereum, there have been over 800 token which are issued based on Ethereum Blockchain. And this is an industry that's still very young, it's just beginning.
MARKET CAP
Data is recorded on 26/05/2020

- TRX: $972,128,815
- EOS: $2,333,863,743
- ETH: $22,700,065,099
- XTZ: $1,943,418,255
- ADA: $1,372,898,312
FUTURE VALUE OF iBid
VALUE #1

Users on the iBid platform do not incur any expenses.

100% FEE-LESS
iBid ECOSYSTEM
VALUE #2

Full ownership of personal database on the iBid ecosystem.
VALUE #3

Profit sharing model from the company.
VALUE #4

Providing quality services and products is not for profit.
Ticker: iBid
Token Price: 1 iBid = 1 USDT
Total supply: 100,000,000
Role of Token: Utility
iBid token is used on Ethereum Blockchain. Mainnet is going to be launched on 06/2021 and iBid token will be converted to iBid coin which is used in iBid ecosystem.
iBid will be generated over a period of 10 years, with 16% being generated in the first year, 29% within 4 years, and 61% within 5 years.

A total of **100.000.000** (one hundred million) iBid coin will be generated. iBid spent on the network will be redistributed to iBid holders.

100% token will be airdrop for community.
Voting allows the list of DApps, products and services in the iBid ecosystem. You have the right to decide which iBid will sponsor and reject projects.

Exchange value in the iBid ecosystem. Creating and maintaining an internal and individual economy is one of the most important tasks of IBID tokens.

iBid tokens are used as a fee gateway for you to use certain functions of an ecosystem.
Payment for services and goods provided by service providers and merchants on the iBid network.
The iBid token can allow the owner to enrich user experience within an iBid ecosystem.

For example, iBid members will have the right to enrich their customers' experience by using their tokens to add ads or other attention-grabbing services on the iBid platform.
Exchange with other tokens that parasitize on the iBid platform.
iBid Platform ROADMAP

1. JUNE 2020
   iBid Auctions on Blockchain

2. MARCH 2021
   Testnet iBid

3. JUNE 2021
   Mainnet iBid

4. AUGUST 2021
   Cross-platform wallet release

5. DECEMBER 2021
   Integrating iBid token for payment on many 4.0 e-commerce platforms

6. JANUARY 2022
   Notice of iBid specifications

7. APRIL 2022
   Allow Dapp listing on iBid platform

8. SEPTEMBER 2022
   iBid decentralized trading platform
INTRODUCING iBid AUCTIONS
THE FIRST PRODUCTS OF iBid ECOSYSTEM
DECENTRALIZING
ASCENDING AUCTIONS
ON iBid BLOCKCHAIN
MISSION OF iBid AUCTIONS
Mission
Bidding to get your favorite items extremely cheap prices by auction on iBid Platform.

Build a platform for real-time, ascending blockchain auctions.

iBid - the decentralizing blockchain auction will transform the bidding processes, becoming fair and transparent as the bidding parties are also able to supervise the auction processes.
The total market capitalization of bidding

The global real-time bidding (RTB) market size to grow at a Compound Annual Growth Rate (CAGR) of 32.9% during the forecast period.
MarketsandMarkets forecasts the global RTB market size to grow from USD 6.6 billion in 2019 to USD 27.2 billion by 2024, at a CAGR of 32.9% during 2019–2024. Major growth factors for the market include rapid increase in the number of smart phone users, and a focus on improved campaign performance and increased RoI.
Problems of centralized auctions

- **Lack of transparency**
- **No interoperability**
- **Security risks**
- **Centralization of processes**
- **Risks of corruption**
- **Low trust from bidders**
iBid VISION
FOR FUTURE
Decentralizing Ascending Auctions on iBid Blockchain
How iBid works, just like another penny auction business, earns most of the revenue by selling the bids. The bids are generally sold in packages and different sizes. The more one bidder bids, the more money will be banked by the company.

On top of the value of the bids, the unalterable final price will be received by the company at which the product is sold.
Business Model

The iBid business model, where the admin will list different products on the platform for auction (you can ONLY list products if you have Platinum or higher packages). To participate in the auction and place a bid on the product, a user will need to purchase bids from some packages. You can start with Bronze Packages which only $25.

Bronze Pack

- 40% bonus of direct referrals
- 6.25% referral bonus up to 8 levels

$ 25
Business Model

An auction starts from $0 and on each bid product auction price will be increased by $0.01.

At the end of the auction, the winner user do not have to pays the final amount.
How does iBid Make Money?

The revenue model has two parts.

iBid works in a way to generate major revenue of the bids purchased from packages by users, from the platform to participate in the auction in different stacks. Along with encouraging repetitive bid purchasing. The winner will not pay for the products.

Besides, iBid also earns from sponsors who wants promote their items.
New blockchain

We choose to use blockchain technology because blockchain is, indeed, perfectly relevant to our project as it answers some security requirements that traditional auctions can not currently guarantee.
The data about each auction is stored in the blockchain.

The blockchain data is stored in **multiple places**.

Every computer that stores a copy of the blockchain must approve each addition, protecting against unauthorized changes.

If any information about the bid changes, the digital signature would change as well. This enables everyone to be able to verify bid information.
New bidding

This is intrinsic part of blockchain, can solve several issues that is inherent to traditional auctions, including the fact that:

They are not transparent. Bidders have no way to ensure the origin, authenticity and legitimacy of a higher bid, bidding history is made trackable and verifiable by anyone.

Current auctions are not open, because of the very essence of their centralization. Bidders must use the organizer’s platform. This is not the case with iBid Blockchain as it can be used solely for its blockchain layer if necessary.

Interoperability is the key. And this is what iBid Blockchain brings.
Advantage iBid

- OPEN SOURCE SYSTEM
- PATENTED TECHNOLOGY
- REFERRAL PROGRAM
- CUSTOMER FIRST
- OWNERSHIP
- GROWTH
AFFILIATE MARKETING
Matrix friends bonus

The matrix friend bonus is built according to a **3x20** (maximum of 20 level).

You only need to **invite 3 members**.

If you invite the 4th member or more, they will automatically be set in a new level, from left to right below level 1.

Nevertheless, you still get 46.25% from the 4th member or more if you invite them directly. But if not, you only get 6.25% from them.
Revenue up to 46,25%

iBid have 8 packages

Members can upgrade to a higher packages still keep the income of the lower packages.

When you start to build the system, you can immediately receive 46,25% revenue from Level 1 and raise up to 50% of the income when building the system to level 8.

In addition, get a bonus of 10% BID (from Platinum Packages) to join the game and bidding in iBid Auctions.

This model can run permanently, with 8 packages, the system gives members incredible income.
**BRONZE PACK**
Bonus:
- 40% bonus of direct referrals
- 6.25% referral bonus up to 8 levels
$ 25

**SILVER PACK**
Bonus:
- 40% bonus of direct referrals
- 6.25% referral bonus up to 8 levels
$ 75

**GOLD PACK**
Bonus:
- 40% bonus of direct referrals
- 5% referral bonus up to 10 levels
$ 225

**PLATINUM PACK**
Bonus:
- 40% bonus of direct referrals
- 4.16% referral bonus up to 12 levels
- 10% iBid token
$ 675

**DIAMOND PACK**
Bonus:
- 40% bonus of direct referrals
- 3.57% referral bonus up to 14 levels
- 10% iBid token
$ 2000

**RUBY PACK**
Bonus:
- 40% bonus of direct referrals
- 3.125% referral bonus up to 16 levels
- 10% iBid token
$ 6000

**GRANDMASTER PACK**
Bonus:
- 40% bonus of direct referrals
- 2.78% referral bonus up to 18 levels
- 10% iBid token
$ 18,000

**LEGEND PACK**
Bonus:
- 40% bonus of direct referrals
- 2.5% referral bonus up to 20 levels
- 10% iBid token
$ 54,000

Why iBid use multi-level marketing model?

If iBid auction operates in the traditional systems, we must pay a lot of money for google, facebook, etc to build a solid community like eBay, eBid, etc which cost very much to create fair play for users.

But if iBid runs on a new model, users start with only $ 25 but can earn up to $15,000 from systems. In addition, when using iBid to bid, users have the opportunity to win many products at very cheap prices compared to market value.
Why do you need to upgrade to Platinum Packages?

- Bonus 10% iBid tokens, which is not available in lower packages.
- Engage in iBid's profit sharing program, gain benefits from its business activities.
- List of products on iBid Auctions
- High Demand and Diminishing Supply.
- DApps listing.
iBid will be new trending of auctions on Blockchain because of

01 Profit up to 46.25%.

02 Easy to start with only $25 but can get profits up to $15,000.

03 No lending, no interest payments.

04 New system diagram.

04 Unlimited passive income.
